Erie Times-News

Erie Weld Products is a custom metal fabrication shop specializing in the design, fabrication, and installation of specialty products and projects. We are a family owned small business established and in continuous operation since 1973 with 22 full time employees. Located in Erie, PA, we serve the industrial, construction, and manufacturing industries from a 25,000 sq. foot production facility in addition to offering field services. We offer certified welders as well as drafting and professional engineering services that work with a team of experienced project managers. We have a long history of satisfying our customer's needs, evidenced by a 90% customer retention rate.

## Capabilities

We have the capability to work with many types of metals (steel, aluminum, stainless, wear abrasive, and tool steel, etc.)

Erie Weld Products is a full metal fabrication facility with the capacity to complete your project, no matter what the size. We offer the ability to complete one time custom projects, prototype fabrication, as well as production runs and just in time productions schedules.
